EGG-CELLENT INTERACTIVE LESSONS

Welcome to All About Eggs!

At All About Eggs we realise how hard it can be to find high quality, curriculum linked, interactive science resources, and that's why we are excited to share our new free resources with you!

All About Eggs have been supporting teachers for years by providing resources to educate students on where their food and fibre comes from. All About Eggs developed a successful incursion program that reached over 15,000 students by delivering hands on science workshops.

All About Eggs now has entered the digital space and has used all the experience gained from the incursion program to develop great, fully interactive, curriculum linked science resources for Foundation up to Year 6 students!

Why should you visit our website and start using our resources?

- They are free
- Linked to the Australian Curriculum
- Developed by teachers for teachers
- All the hard work is done for you - complete teacher lesson plans and accompanying interactive lessons provided

To find out more and get started visit us at:
